Digital Seal & Temp-Stat Relay

Panel Mount Case (through the door)
1-Input or 2-Input
5K to 200KΩ Seal Adjustments
Options:
- NC Seal Float Input
- PTC Over-Temp Input
Independent Relays
Manual or Automatic Reset

www.rke.com
Purpose
The STRP monitors the seal and embedded temperature sensors on submersible pump motors to detect failure in the seal or an over temperature condition. If the resistance in the seal area goes lower than the set point or the temp-stat opens, individual relay outputs will be energized, one for a seal failure and one for a temp-stat failure.

Operation
2-Input Operation
To monitor the seal for a leakage, low voltage is applied to the seal sensor. If the resistance sensed falls below the adjustable trip point, the seal fault output relay will be energized. High resistance is considered “good”.

To monitor the temp-stat, low voltage is applied to the normally closed contact. If the contact opens, the temperature fault output relay will be energized. A normally closed input is considered “good.”

1-Input Operation
An alternate input option is also built into the STRP. With the 1-input option selected, if the resistance falls in between 330Ω and 1,500Ω, both the seal and temp-stat are considered “good”. If the input resistance falls below 330Ω, a seal fault is indicated and the seal fault output relay will be energized. If the input resistance goes above 1,500Ω, a high temperature fault is indicated and the temperature fault output relay will be energized.

General Operational Specifications
Faults: Seal Failure, Over Temperature
Set-Up: Membrane Buttons & Digital Display
- 1-Input or 2-Input operation
- Resistance on the 2-input operation from 5KΩ to 200KΩ
- Manual or Automatic reset after a fault has been corrected.

Screens: Manufacture Name & Firmware Version
Status Screen:
- Indicates Seal Condition & Resistance sensed
- Indicates Temp-Stat Condition
Input and Seal Resistance Screen:
- 1-Input Operation (Scroll to bottom of screen)
  (No resistance is selectable, trip points are fixed.)
- 2-Input Operation
  (Scroll up or down to select the seal trip resistance.)
  Manual or Automatic Reset

Default Set-Up
Operation: 2-input
Seal: 100KΩ
Temp: Normally Closed Contact
Reset: Manual
**Custom Set-Up**

The STRP uses the 4 membrane buttons to allow the customer to change the set-up criteria. The following listings show the arrangement and selections available by moving through the menu choices. The membrane buttons allow for movement right or left with wrap around to selection criteria and up and down within a selection for specific parameters.

You can select the set-up parameters with only the supply voltage connected.

**Example:**
- You would like to change the seal fault resistance from 100KΩ to 50KΩ. Use the right arrow to scroll to the resistance screen. Use the down arrow to scroll down to 50KΩ. By moving back to the status screen or waiting 10 seconds, the new 50KΩ set-up will be stored and return you to the status screen.
- You would like to change the reset from Manual to Automatic. Use the right arrow to scroll to the reset screen. Use the up/down arrow to scroll to Automatic. By moving back to the status screen or waiting 10 seconds, the STRP will now have automatic reset and return you to the status screen.
- You would like to change the operation from 2-Input to 1-Input operation. Use the right arrow to scroll to the resistance screen. Use the down arrow to scroll to the bottom where it will say "1-Input". By moving back to the status screen or waiting 10 seconds, the STR will now have 1-Input operation and return you to the status screen. With the 1-Input option, the seal resistance parameters are fixed.

**Screens**

| Manufacturer's Screen | R-K ELECTRONICS  
| STRP v0.0.00 |
| --- | --- |
| **Status Screen** | SEAL 100K GOOD  
| TEMP GOOD  
| SEAL 100K GOOD  
| TEMP 180 GOOD  
| *If seal resistance exceeds 9,999KΩ, the display will show “HIGH”* |
| **Operation & Resistance Screen** | 1-INPUT (at the top of the screen)  
| **T-Stat Input** | NC Contact  
| PTC Resistance |
| **Seal Output Option** | ON = Good (Output relay energized when seal is good.)  
| ON = Bad (Output relay energized when there is a seal fault.) |
| **Reset Options Screen** | AUTOMATIC

Specifications
Supply Voltage: 12VDC & 24VDC, 24VAC, 120VAC & 240VAC
Part Number: Pluggable Blocks:
  12 VDC: STRP-12D-B
  24 VDC: STRP-24D-B
  24 VAC: STRP-24A-B
  120 VAC: STRP-120A-B
  240 VAC: STRP-240A-B
Inputs: 5VDC @ 2mA
2-Input:
  Seal: Adjustable 5KΩ to 200KΩ, +5KΩ Hysteresis
  Temp-Stat: 1NC Contact, Good condition
1-Input:
  Seal Fault: <330Ω
  Temp-Stat Fault: >1,500Ω
Contact Ratings: 5A @ 120VAC, 25°C
  Seal: 1NO
  Temp: SPDT
  3A @ 120VAC @ 60°C Max, Resistive
  3A @ 277VAC @ 60°C Max, Resistive
  1/6HP @ 120/277VAC @ 60°C Max
  5A @ 30VDC @ 60°C Max
  C150 Pilot Duty, 1NO Only
Adjustments: (4) Membrane Buttons
Display: 16 Character, 2-line display, with back light
Mounting: Panel Mounting
Body: 2-7/8" Circular Hole (2-1/2" conduit punch)
Holes: (4) Mounting Holes, #10
Termination: Pluggable Terminal Blocks
Packaging: Approx. 3.88"x3.88Wx3.6"D (Front to back of terminal blocks)
Nema 12
